 Dataset Name: EasyVisa.csv

 Rows: 25,480

 Columns: 12

 Numeric Columns: 3

 Categorical Columns: 9

 Datetime Columns: No datetime columns detected

 Boolean Columns: No boolean columns detected

 Missing Values: No missing values found

 Duplicate Rows: No duplicate rows found

 Memory Usage: 3.42 MB

Bivariate Analysis

Correlation Analysis

Multivariate Analysis

Executive Report

 **Missing Value Analysis**

Understand your dataset before proceeding with further analysis.

- Missing values treatment will be decided based on the percentage of missing values data vs overall data.
- Since there are no missing values in your current dataset, No Analysis will be performed in this stage.
- In Future if missing values observed, treatment will be as given below.
 - No Treatment: Missing values %age <=2% : Data will be left as is
 - Conservative Treatment: Missing values %age >2% and less than 6% : Data will be imputed by mean/median based on the variance
 - Aggressive Treatment: Missing values %age >2% and less than 6% : Entries will be deleted

 **Duplicate Record Analysis**

Understand your dataset before proceeding with further analysis.

- Duplicate Record treatment will be decided based on the percentage of Duplicate records vs Overall data.
- Since there are duplicate records in your current dataset, No Analysis will be performed in this stage.
